CAEAres

The tetherless CAE Ares Emergency Care Manikin has the following unique features:

Date —09/ 1222

LearningSpaceEssentialsSole Source

CAE Healthcare Inc. is the sole source manufacturer of the LearningSpace Essentials audiovisual system. CAE's proprietary LearningSpace Essentials software is a web-based, simulator agnostic platform for simulation recording, debriefing, performance assessment and more.

The software does not require licensing fees per user or location and is inclusive of the following software modules: recording, review, scenario authoring, pre-loaded Learning Module, calendar, LDAP, and user manager. CAE LearningSpace is a turnkey system that includes servers that are imaged with the proprietary software application.

Furthermore, CAE is the sole provider of installation, training, technical services, warranty, and maintenance on LearningSpace. This letter is valid one year.

CAE Luna Sole Source Letter

CAE Healthcare Inc. is the sole source manufacturer of the etherless Luna Infant Simulator. Luna is controlled by the CAE's proprietary Mestro software which, an instructor-driven software that can be paired with CAE Physiology. Only CAE physiology adapts to interventions based on the patient's age, weight, underlying health conditions and accuracy of the learner's treatment.

Luna also includes CAE's copyright protected instructional content, Simulated Clinical Experiences (SCEs). SCEs provide a turnkey solution for simulation events and curriculum integration. Each SCE includes a preprogrammed scenario to run on the manikin plus the following instructional content: synopsis, patient history, learning objectives, performance measures, facilitator notes and debriefing points.

Furthermore, CAE is the sole provider of installation, training, technical services, warranty, and maintenance on the Luna simulator. This letter is valid for one year.

Sincerely,

Grace Gagliano

CAELuna

The tetherless Luna Infant Simulator has the following unique features:

- f* Modular manikin available in 3 configurations: Base, Live, Advanced
- f* Maestro operating software
- f* CAE Physiology, the only validated computational model of human physiology in patient simulators automatically drives realistic patient responses to clinical interventions (optional add)
- f* Simulated Clinical Experiences (SCEs):
 - o* Neonatal Resuscitation
 - o* Poor Perfusion
 - o* Pneumothorax
 - o* Neonatal Abstinence Syndrome
 - o* Infant (1 month) Code
- f* StethoSym technology for auscultation of heart, lung, and bowel sounds
- f* SymDefib for defibrillation with commercial device
- f* Mechanical ventilation support
- f* Optional external lung for airway resistance adjustment
- f* Bleeding via externally connected IV
- f* Substernal retractions synchronized with chest excursion
- f* Subcutaneous (1.1 (504 (o)4 0 Td t)-4 (i.1 (()Tj 37 >>BDC .46 0 Tw 0.22)3 (V) (c)4 (u)-4 (lr I

LearningSpaceEssentials

LearningSpaceEssentials has the following unique features:

- f* Scalable software available to upgrade to Enterprise tier
- f* Modular hardware available in four platforms: LearningSpace One, LearningSpace One + Connect, LearningSpace Server Based, LearningSpace Ultraportable
- f* HTML5, plug-in free software
- f* Software pre-loaded with CAE Learning Modules
- f* Scenario Authoring to build and design any Simulated Clinical Experiences
- f* Pre-loaded reports to assess individual or group performance
- f* CAE Maestro software simulators can be controlled from Single Room View
- f* Industry leading latency of <1 sec on live broadcasts
- f* 4 simultaneous camera streams per room or 3 simultaneous camera streams plus 1 simulator per room
- f* Live stream videos to any number of remote sites
- f* Simultaneously view up to 12 live streams on center overview screen
- f* Integrate any patient simulator model to capture patient data in real time
- f* 12,000 hours of HD video storage per server
- f* Search videos by name, date, physiological data, and events
- f* Built-in intercom functionality
- f*
