RE: Sole Source Letter for Renaissance Star 360 ®

software continually tailors the test based on a student's response to the current question—increasing the difficulty after a correct answer and decreasing difficulty after an incorrect answer. In this way, each assessment is built for the individual student, and test blueprint content is concentrated at the student's current performance level. This yields extremely accurate information about the skills that the student has and has not learned, using relatively few test items. Having regular feedback from tests enables educators to adjust their teaching so they can help students achieve personalized learning goals as well as master state standards.

The following key features and qualities of Star 360 make it unique in meeting the needs of schools and districts in the state.
